DETAILED ACTION

An amendment of 9/27/06 amended claim 3, added new claim 11, and canceled claims 1, 2 and 4-10.

Claims examined on the merits are 3 and 11, which are all claims
5 in the application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

Claims 3 and 11 are rejected under 35 U.S.C. 112, first
10 paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

15 The specification fails to describe apparatus structure in sufficient detail. No structural details of structure for a chromatography pump, an autosampler, chemiluminometer, flow cell, horseradish peroxidase immobilized stationary phase packed in the flow cell, and photomultiplier in contiguity with a surface of the flow
20 cell are provided. The drawing shows no structure of apparatus components used.

Response to Arguments

The remarks of the amendment urge that apparatus components required are commonly used in chemiluminescence devices, and the
25 amendment contains attached drawings from technical manuals of a

Art Unit: 1657

representative chemiluminometer, autosampler and HPLC pump manufactured by JASCO Corporation. However, there is inadequate evidence to establish that a chromatography pump, autosampler, chemiluminometer, flow cell, horseradish peroxidase immobilized stationary phase packed in the flow cell, and photomultiplier in contiguity with a surface of the flow cell are commonly used in chemiluminescence devices, and are well known in the art. The devices of the attached drawings merely show outside housings of the chemiluminometer, autosampler and HPLC pump, and provide no better description of the devices than the present specification. Moreover, it is unclear when the technical manuals containing the drawings were published and available to the public, and how readily available these manuals were to the public. Articles and/or patents that are readily available to the public and published prior to the filing date of the present application should be supplied describing components and functioning of the chemiluminescence devices required by the claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action

is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
